

Why test HDL3-C

16
%

OF OUR TURNOVER IS REINVESTED INTO R&D

Allowing us to bring the most cutting-edge products to market, with a focus on some of the world's most common diseases including CVD

1

NICHE PRODUCT

The HDL3 Cholesterol (HDL3-C) test is one which is niche on the market

MORE INFORMATION

HDL-C (AKA 'good' cholesterol) comprises of several subclass particles. HDL3-C is a smaller and more dense sub-fraction of the HDL particle.

Testing HDL3-C gives a doctor extra information on a patient's risk of cardiac events

20
%

OF CARDIAC RISK PATIENTS

are picked up using the standard cardiac risk tests (cholesterol, HDL, LDL and triglyceride levels)

80
%

FURTHER TESTING

The other 80% can only be identified by carrying out more detailed risk testing
