

Environmental Policy

Randox Laboratories is an international clinical diagnostics company specialising in the development, manufacture and distribution of in vitro diagnostic reagents, quality control materials and automated clinical chemistry and immunoassay analysers.

We recognise that our activities have an impact on the environment and are committed to reducing these. We endeavour to promote practices which support sustainable development, protect the environment and encourage resource efficiency.

Randox Laboratories is committed to:

- Assessing the environmental risk from our activities, preventing pollution and protecting the environment.
- Encouraging and supporting staff to reduce, reuse and recycle.
- Minimising waste sent to landfill and increasing resource efficiency.
- Establishing and maintaining our Environmental Management System.
- Increasing the environmental awareness of staff through training and instruction.
- Communicating internally with the various levels and functions of the organisation and externally with all interested parties.
- Continual monitoring and improvement of our environmental performance.
- Monitoring government bodies to ensure compliance with good environmental practice.
- Ensuring appropriate handling and storage of resources and materials.
- Endeavouring to source and utilise products from sustainable systems.
- Encouraging sustainable transport and route planning logistics.
- Ensuring we are fully compliant with all environmental legislation and other requirements.
