

# RANDOX

## Environmental Policy

Randox is an international clinical diagnostics company specialising in the development, manufacture and distribution of in-vitro diagnostic reagents, quality control materials and automated clinical chemistry and immunoassay analysers.

We recognise that our activities can impact on the environment and we are committed to reducing these through the identification of significant environmental aspects, compliance obligations and considering risks and opportunities. We aim to promote practices which supports sustainable development, environmental protection, and efficient resource use.

Randox is committed to:

- Assessing the environmental risk from our activities, preventing pollution and protecting the environment.
- Compliance with all applicable environmental legislation and other requirements.
- Improving environmental performance through implementation and continual improvement of our Environmental Management System (EMS).
- Integrating the EMS throughout all business processes.
- Sustainable procurement of raw materials, equipment, and energy supply.
- Improving resource efficiency throughout the design, development, and manufacture of products.
- Minimising waste sent to landfill and encouraging waste prevention, reuse and recycling.
- Increasing environmental awareness of staff through training and internal communications.

Dr. S. P. Fitzgerald
