

**I-FABP**

**Human, Recombinant, *E. coli***

<b>Cat. No.:</b>	RCP9329	<b>Size:</b>	10µg
	RCP9330		100µg
	RCP9331		1000µg

**Synonym:** Fatty Acid Binding Protein, Intestinal; FABP-2;

**Description:** Fatty acid binding proteins are a family of small, highly conserved, cytoplasmic proteins (14-15kDa) that bind long chain fatty acids, their CoA derivatives, bilirubin, organic anions and other small hydrophobic molecules. I-FABP (or FABP-2) is found predominantly in the intestine and is believed to be involved in the intestinal absorption of long chain fatty acids.

**RANDOX** recombinant I-FABP comprises a 132 amino acid fragment (1-132) corresponding to the human intestinal FABP protein and is expressed in *E. coli* with an amino-terminal hexahistidine tag. This product is for research use only and is not intended for diagnostic or therapeutic use.

**Form:** Liquid

**Purity:** >95% by SDS-PAGE
