Anti-Cardiac Troponin I (cTnI) epitope 190-209 Antibody Fragments

Target: Anti-Cardiac Troponin I (cTnI) epitope 190-209

Clone Name: 1542.4D1

Catalogue Number: RAF9358

Description: Recombinant single-chain variable fragment (scFv) obtained from Sheep and expressed in an E. Coli to bind against human Cardiac Troponin I (cTnI) antigen.

Activity/ Specificity: Tested positive against native cTnI antigen. Shows no cross-reactivity against a panel of nonspecific antigens including skeletal troponin I (sTnI).

Applications: These fragments contain His and c-Myc fusion tags which may be used for detection or immobilisation. Recombinant antibody fragments are suitable for use in ELISA immunoassays, biosensor applications, western blots, immunohistochemistry, flow cytometry, immunoaffinity purification and most other immunological methods.

Size: Approximately 35 kDa

Quantity: 1 mg

Concentration: Typically >1mg/ml

Purity: >90% assessed by SDS-PAGE.

Storage: These fragments are stable at 4°C. It is recommended that for storage over extended periods they are kept at −20°C and should not be subject to repeated freeze-thaw cycles.

Buffer: 1x PBS containing 0.09% sodium azide preservative.

Dilution Factor: To be determined by end-user.
