Anti-FABP8 (Myelin Fatty Acid Binding Protein) Recombinant Antibody Fragments

Target: Anti-FABP8 (Myelin Fatty Acid Binding Protein)

Clone name: MC61.B3

Catalogue Number: RAF9487

Description: Recombinant single-chain variable fragment (scFv) obtained from Sheep and expressed in an E. Coli to bind against human FABP8 (Myelin Fatty Acid Binding Protein) antigen.

Activity/ Specificity: Tested positive against FABP8 antigen. Cross-reactivity checked against a panel of known cross-reactants and non-specific antigens.

Applications: These fragments contain His and c-Myc fusion tags which may be used for detection or immobilisation. Recombinant antibody fragments are suitable for use in ELISA immunoassays, biosensor applications, western blots, immunohistochemistry, flow cytometry, immunoaffinity purification and most other immunological methods*.

Size: Approximately 35 kDa

Quantity: 1 mg

Concentration: Typically >1mg/ml

Purity: >90% assessed by SDS-PAGE.

Storage: These fragments are stable at 4°C. It is recommended that for storage over extended periods they are kept at –20°C and should not be subject to repeated freeze-thaw cycles.

Buffer: 1x PBS containing 0.09% sodium azide preservative.

Dilution Factor: To be determined by end-user.

* This product as supplied is intended for research applications only. It is not for use in therapeutic or diagnostic applications without the expressed written authorization of Randox Life Sciences.
