

VCAM-1 Fragment

Human, Recombinant, *E. coli*

Cat. No.:	RCP9076	Size:	10µg
	RCP9077		100µg
	RCP9158		1000µg

Synonym: Vascular cell adhesion molecule 1, INCAM-100, Vascular cell adhesion protein 1 precursor, CD-106 antigen.

Description: VCAM-1 is a cell surface sialoglycoprotein expressed by cytokine activated endothelium. The protein has a number of functions including the regulation of leukocyte migration, leukocyte-endothelial cell adhesion and signal transduction. VCAM-1 may also play a role in a number of inflammatory diseases.

RANDOX recombinant VCAM fragment comprises a 203 amino acid fragment (109-331) corresponding to the Ig-like C2 type domains 2 and 3 and is expressed in *E. coli* with an amino-terminal hexahistidine tag. This product is for research use only and is not intended for diagnostic or therapeutic use.

Form: Liquid

Purity: >95% by SDS-PAGE
