**sTNFR-I**  
**Human, Recombinant, E. coli**

**Cat. No.:** RCP9096  
**Size:** 10µg

**Synonym:** Soluble tumour necrosis factor receptor-1; Tumour necrosis factor receptor subfamily member 1A (TNFRSF1A); Tumour necrosis factor binding protein I (TNFBPI); Tumour necrosis factor receptor type I (TNFRI); Tumour necrosis factor-alpha receptor (TNFAR); CD120a antigen; p55; p55-R; p60; MGC19588.

**Description:** Two types of soluble TNF receptors (sTNFR-I and sTNFR-II) have been identified, which act to neutralize the biological activities of TNF alpha and TNF beta. Levels of these soluble receptors appear to arise as a result of shedding of the extracellular domains of the membrane bound receptors. Elevated levels of soluble TNF receptors have been found in the amniotic fluid of pregnant women.

**Form:** Liquid. 
Supplied in 1x Laemmli Buffer (25mM Tris-HCl pH6.8, 50mM DTT, 1%(w/v) SDS, 0.1%(w/v) Bromophenol Blue, 2.5% Glycerol).

**Purity:** Single band on Western blot.
