sTNFR-II | Human, Recombinant, E. coli
--- | ---
Cat. No.: | RCP9166
 | RCP9167
 | RCP9168
Size: | 10μg
 | 100μg
 | 1000μg

**Synonym:**
- Tumour necrosis factor receptor 2; Tumour receptor beta receptor; Tumour necrosis factor binding protein 2; Tumour necrosis factor receptor superfamily member 1B; Tumour necrosis factor receptor type II; p80 TNF alpha receptor; Etanercept; CD120b; p75; TBPII; TNFRII, TNFR75; TNFBR; TNFR2; TNFR80.

**Description:**
Two types of soluble TNF receptors (sTNFR-I and sTNFR-II) have been identified, which act to neutralize the biological activities of TNF alpha and TNF beta. Levels of these soluble receptors appear to arise as a result of shedding of the extracellular domains of the membrane bound receptors. Elevated levels of soluble TNF receptors have been found in the amniotic fluid of pregnant women.

*RANDOX* recombinant sTNFR-II comprises a 184 amino acid fragment (23-206) corresponding to the mature sTNFR-II protein and is expressed in *E. coli* with an amino-terminal hexahistidine tag. This product is for research use only and is not intended for diagnostic or therapeutic use.

**Form:** Liquid

**Purity:** >95% by SDS-PAGE
