

## RIQAS PAST PANELS

RIQAS (Randox International Quality Assessment Scheme) is the largest global EQA scheme with over 76,000 participants in more than 139 countries. Our range currently comprises 44 programmes and the majority of clinical testing. RIQAS Past Panels can be used to facilitate a series of QC and interlaboratory functions including:

**METHOD  
VALIDATION**

**INSTRUMENT  
VALIDATION**

**POOR  
PERFORMANCE  
TROUBLESHOOTING**

**ASSAY  
EVALUATION**

**STAFF  
TRAINING**

## BENEFITS OF RIQAS PAST PANELS

Past Panel samples span multiple levels, making them ideal for ensuring accurate instrument performance across the measuring range.

Past Panels are provided with an Excel document containing supporting data for the majority of instruments and methods of interest.

# RIQAS PROGRAMMES

Ammonia/Ethanol Programme

Anti-Müllerian Hormone (AMH) Programme

Anti-TSH Receptor Programme

Blood Gas Programme

BNP Programme

Cardiac Programme

Cardiac Plus Programme

Cerebrospinal Fluid Programme

Coagulation Programme

CO-Oximetry Programme

CYFRA 21-1 Programme

Cytokines Programme

General Clinical Chemistry Programme

Glycated Haemoglobin Programme (HbA1c)

Human Urine Programme

Immunoassay Programme

Immunoassay Speciality 1 Programme

Immunoassay Speciality 2 Programme

Immunosuppressant Programme

Lipid Programme

Maternal Screening Programme

Microbiology (Bacterial Identification) Programme

Neonatal Bilirubin Programme

Pre-eclampsia Programme

Serology (Chagas) Programme

Serology (EBV) Programme

Serology (HIV-Hepatitis) Programme

Serology (Syphilis) Programme

Serology (ToRCH) Programme

Serum Indices Programme

Specific Proteins Programme

Sweat Testing Programme

Therapeutic Drugs Programme

Urinalysis Programme

Urine Toxicology Programme
